

**Amendments To The Claims**

This listing of claims will replace all prior versions, and listings, of claims in the application:

Claim 1 (previously presented):      A method comprising:  
    detecting an event;  
    searching for an event profile corresponding to the event;  
    detecting content transmitted by a participant of the event and description  
information corresponding to the content; and  
    associating the content with the event based on the description information and  
the event profile.

Claim 2 (original):      The method according to claim 1 further comprising matching the  
description information with the event profile.

Claim 3 (original):      The method according to claim 1 wherein the event profile  
includes an event location.

Claim 4 (original):      The method according to claim 1 wherein the event profile  
includes an event time.

Claim 5 (original):      The method according to claim 1 wherein the event profile  
includes an event duration.

Claim 6 (original):      The method according to claim 1 wherein the event profile  
includes a listing of event participants.

Claim 7 (original):      The method according to claim 1 wherein the description  
information includes a capture location.

Claim 8 (original): The method according to claim 1 wherein the description information includes a time.

Claim 9 (original): The method according to claim 1 wherein the description information includes an author.

Claim 10 (original): The method according to claim 1 wherein the content is a digital image.

Claim 11 (original): The method according to claim 1 wherein the content is one of a video media, an audio media, a textual media, and a graphical media.

Claim 12 (original): The method according to claim 1 further comprising storing the event profile.

Claim 13 (original): The method according to claim 1 further comprising storing the description information with the content.

Claim 14 (previously presented): A system comprising:  
means for detecting an event;  
means for searching for an event profile corresponding to the event;  
means for detecting content relating to the event and transmitted by a participant of the event and description information corresponding to the content; and  
means for associating the content with the event based on the description information and the event profile.

Claims 15- 19 (canceled)

Claim 20 (previously presented): A system, comprising:

- an interface module to receive content and description information corresponding to the content, wherein the content is relating to an event is captured and transmitted by a participant of the event;

- a storage module to store a record containing an event profile describing the event; and

- a content categorization module for matching the content with the event based on the event profile and the description information.

Claim 21 (original): The system according to claim 20 further comprising an event detection module to detect the event.

Claim 22 (original): The system according to claim 20 wherein the storage module stores the description information and the content.

Claim 23 (original): The system according to claim 20 further comprising an access control module to selectively allow a user to view the content.

Claim 24 (previously presented): The system according to claim 23 wherein the access control module allows the user to view the content when the user is one of the plurality of participants listed in the event profile associated with the event.

Claim 25 (previously presented): A computer-readable medium having computer executable instructions for performing a method comprising:

- detecting an event comprising a plurality of participants and storing an event profile;

- receiving content relating to the event from one of the plurality of participants;

- receiving a request to access the content from a user;

- searching for the event profile corresponding to the content;

matching the content with the event profile; and  
displaying the content based on the user and the event profile.

Claim 26 (previously presented): A method comprising:  
receiving an event profile comprising at least one attribute relating to an event;  
receiving content and corresponding content description information comprising  
at least one attribute related to the content; and  
associating the content with the event when the at least one attribute related to the  
event matches the at least one attribute related to the content.

Claim 27 (previously presented): The method of claim 26 wherein the event  
comprises multiple participants and the content having been received is transmitted by  
one of the multiple participants.

Claim 28 (previously presented): The method of claim 25 further comprising:  
displaying the content when requested by a participant of the event, wherein the at  
least one attribute related to the event is a list of participants of the event.

Claim 29 (previously presented): The method of claim 25 further comprising:  
associating the content with the event when the at least one attribute related to the  
content and the at least one attribute related to the event match by one of:  
an author of the content and a participant of the event;  
a time and date of a capturing of the content and a time and date of the event; and  
a location of the capturing of the content and a location of the event;  
wherein the at least one attribute related to the event comprises at least one of the  
event location, the event time and date, the event duration and the participant and wherein  
the at least one attribute related to the content comprises at least one of the author of the  
content, the time and date of the capturing of the content and the location of the capturing  
of the content.
